# One coolant for grinding and machining.

## Synergy 915

### High-performance full-synthetic metalworking fluid

- High feed rates and excellent surface quality
- Low consumption, clean machines and easy-to-clean workpieces thanks to the excellent rinse behavior
- Low foaming – ideal for high-pressure systems
- Very good filterability
- High stability – suitable for central systems
- Suitable for steel alloys, cast iron, nickel alloys and ceramics
- Ideal for wet machining of CFRP
- Free of critical substances such as boron and formaldehyde as well as chlorinated and sulfurous EP additives

## Stable processes – lower costs

Compact filter cake thanks to the excellent filterability

For single machines and central systems

### Profit from our unique Liquid Tool

Productivity, economic efficiency and machining quality are factors that critically depend on the choice and the quality of your metalworking fluid.

With our profound know-how and experience, customized services and excellent products, we help you fully capitalize on the potential of your machines and tools and turn your metalworking fluid into a key success factor – a Liquid Tool.
